FACILITIES, GENERAL.

** In the stall containing feed, in the H barn, the hay was on the floor and up against the the wall. The hay should be elevated and away from the walls to promote good air flow to prevent molding.

** In the Large Animal Clinic barn the feed room had open bags of feed with insects flying in and out of it. The feed needs to be properly contained or stored.

Supplies of food shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin for the health and well-being of the animals Correct by May 5, 2016

The exit interview was conducted with the Attending Veterinarian.
