PYMATUNING DEER PARK

Type: ROUTINE INSPECTION

Date: 22-JUN-2016

3.125(d)

FACILITIES, GENERAL.

A decomposed animal carcass was found in the shelter area of the Fallow Deer enclosure. The presence of an animal remains in this enclosure promotes disease transmission amongst the herd. Provisions shall be made for the removal and disposal of animal and food wastes, bedding, dead animals, trash and debris. Correct by properly disposing of these animal remains and cleaning the enclosure at a frequency to which these animal carcasses can be found prior to decomposition.

Correct by end of business on 6/22/16.

3.127(d)

FACILITIES, OUTDOOR.

The perimeter fence in the Fallow Deer enclosure had a gap between the ground and the bottom of the fence. This gap is large enough that the smaller Fallow Deer could escape, or that another animals could enter the exhibit. This fence-line acts as the primary enclosure fence as well as the perimeter fence. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

Correct by July 6, 2016.

3.130

WATERING.

On today's inspection, the inside of the Fallow Deer, Nialgi, Lions and Tiger water receptacles were covered in algae and debris. The facility representative stated that the water receptacles was due to be cleaned. He stated that the receptacles is cleaned on a weekly schedule. However; it had not been cleaned prior to today s inspection. A facility employee took out a scrub brush and scrubbed the water receptacles while the inspector was at the facility

Inspection Report

completing the inspection. All water receptacles must be cleaned and sanitized using commonly accepted husband standards as often as necessary to prevent organic growth. A cleaner and a sanitizer must be used during the cleaning process. In addition, potable water must be made available as often as necessary for the health and comfort of the animals. Correct this by ensuring all water and receptacles are maintained in a clean and sanitary condition.

Corrected by end of business on 6/23/2016

An inspection and exit briefing was conducted with the facility representative with ACI- Andrea D'Ambrosio and VMO Dr. Michael Neafsey at the time of the inspection.
