Type: ROUTINE INSPECTION
Date: 16-DEC-2014

This inspection was conducted as a focused inspection focusing on the 2.40 Veterinary care issues documented on the last inspection on Dec. 11 2014.

All animals were seen and treatment initiated the next day, Dec. 12 2014 by the attending veterinarian.

Written documentation of treatment by veterinarian was provided.

Further treatment is continuing by licensee.

Due to their age and not being bred for several years the two 11 year old bernese females were permanently removed as breeders and housed as pets offsite treatment will continue.

The Cavalier dog is back in the kennel and appears treatments have improved the issues

Exit interview was conducted at time of inspection with facility representative.
