Type: ROUTINE INSPECTION
Date: 30-JUL-2014

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

On inspection, a 16 month old male Dromedary camel named Bulla was found to be in need of veterinary care. The camel's left rear leg had multiple cuts above the foot on the outside surface of the leg. The multiple cuts ranged in size from approximately 0.5 to 3 inches and displayed hair loss in the areas of the wounds. Some of the cuts were black in color while other cuts were pink to red in coloration. The camel was observed shifting its weight to the right rear leg while also picking up the left rear leg periodically. The left hind leg appeared swollen compared to the right hind leg. According to staff, the injury was being treated with a topical spray, but no documentation was available to verify the treatment. A veterinarian had not been contacted about the injury to the camel leg because the licensee stated he thought it was a minor cut and it didn't need veterinary involvement. The Program of Veterinary Care did not have any listed medications or treatments for cuts, wounds, or any injuries. By not appropriately treating the camel's injury not only is it causing pain and discomfort in the animal but also it exposes the animal to secondary infections and further medical complications. This animal must be seen by a licensed veterinarian. Documentation of examination, diagnosis and treatment must be maintained by the Licensee and made available for further inspection by APHIS officials. In addition, the licensee must have frequent communication with his attending veterinarian for all health issues within a timely manner. All medications and treatments must be approved, in writing, by the attending veterinarian before use on any animal.

Correct By: Corrected at time of Exit

Inspection conducted by Staff and Exit conducted with Licensee on 7/30/2014.

Inspection sent by Certified mail at Licensee's request on 7/31/2014.
