### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Severe mats were observed on approximately 10 dogs.

Dog identified with microchip number -14174 adult white poodle located in Pen 11 in the sheltered housing building had matted hair covering most of the body from the neck to the tail. The matted hair under the tail contained fecal material. Matted hair on all four feet contained brown debris.

Dog identified with microchip number -0638 adult white poodle located in Pen 14 in the sheltered housing building had matted hair over most of its body. Matted hair on all four feet and the lower parts of the legs contained brown-black debris and staining. Matted hair fell from the dog's forehead over its eyes such that the eyes were not readily visible.

Mats can be painful, cause skin irritation and infection, and trap moisture. Mats may trap foreign material and may mask underlying conditions in the adjacent skin. Mats under the tail may interfere with urination and defecation. Mats over the eyes may interfere with vision.

The facility shall use appropriate methods to prevent, identify, and address mats.

Correct by July 31, 2019.

This inspection and exit interview were conducted with the undersigned facility representative.
