Type: ROUTINE INSPECTION  
Date: 18-JAN-2023

---

### 3.125(a) Repeat

#### Facilities, general.

The inside den area for the white tiger has some diamond mesh metal that has two holes with points exposed that the tiger could contact. While the wall behind it is undamaged, the exposed wire points could injure the tiger. Ensure that enclosures are kept free from metal points and in good repair to protect the animals from injury.

### 3.125(c)

#### Facilities, general.

The produce storage area and a walk-in freezer in use to store some dry feed for the bears had signs of rodents in the area. Two live mice were seen in these areas and a hole with chewmarks in some insulation by a door, and there were rodent droppings and loose food on/around the boxes. Rodents in food storage areas can contaminate food and contaminated food can make animals sick. Ensure to improve this produce storage area and dry food storage area to protect the supplies against any contamination by vermin.

\*\*\*Correct by 1/23/2023.

### 3.127(c)

#### Facilities, outdoor.

One of the shelters for the 3 wolves has standing water in it. Per representatives two wolves share a larger den-type shelter and the third uses another shelter in the back that can't be seen from the viewing area and the one with puddles in

## Inspection Report

---

it is rarely used by any of the wolves. Standing water in a shelter makes it so it cannot be used for animals. Ensure that each shelter is accessible and has adequate drainage for the wolves so that if a wolf can't share a shelter with the others they each have access to dry sheltered areas.

\*\*\*Correct by 1/20/2023.

This inspection and exit interview were conducted with facility representatives.
