Type: ROUTINE INSPECTION
Date: 23-FEB-2022

2.75(a)(1)

Records: Dealers and exhibitors.

A current record of guinea pigs on hand was not available for review. A total of 100 adult guinea pigs and 30 newborns were counted during this inspection. There were no inventory records of the number of adults, weanlings, and newborns present for the last few months. Failure to maintain these records can make it difficult to assess the health of the caviary by identifying guinea pig additions and losses by deaths or decreasing numbers of animals born or animals kept for replacements. The facility must maintain records on the number of guinea pigs held, owned, births, deaths, and sale of animals. Correct by February 28, 2022.

3.26(d)

Facilities, indoor.

Interior surfaces. Two walls of the guinea pig room were covered with plastic sheeting. There was bare wood on the other two walls and floor of the guinea pig room. Indoor surfaces must be impervious to moisture so that surfaces can be repeatedly cleaned and sanitized, won't retain odors, and do not allow the absorption of moisture or liquids. Licensee must ensure that room wall surfaces and floor are impervious to moisture so that the surfaces can be repeatedly cleaned and sanitized, won't retain odors or moisture. Correct by May 1, 2022.

3.31(c)

Sanitation.

Inspection Report

Pest control. A dead mouse was noted on the floor in the guinea pig area near the wall covered with plastic sheeting. An effective program for the control of pests must be established and maintained to prevent disease risks to the guinea pigs. Correct by March 1, 2022.

This inspection was conducted with the licensee and exit interview were conducted with a family member.
