Type: ROUTINE INSPECTION
Date: 18-NOV-2024

2.75(b)(1)

Records: Dealers and exhibitors.

There were no records of acquisition or record of animals on hand available at the time of the inspection for the 11 chickens.

Per this Section, exhibitors shall make and maintain complete records regarding the details of the acquisition and disposition of animals in their possession to account for the sources of the animals and any animal transfers. The Licensee needs to prepare records of acquisition and a record of animals on hand for these birds and ensure that the animal records are kept current for all future animal acquisitions. Correct by 12/23/24.

2.134(b)

Contingency planning.

The Contingency Plan has not been reviewed by the licensee on at least an annual basis. The last review of the Contingency Plan was completed on 10/28/22.

Per this Section, all exhibitors must review their Contingency Plan on at least an annual basis to ensure that it adequately addresses potential emergency situations that could be detrimental to the health and well-being of the animals. The Licensee needs to review the Contingency Plan and document the review. Correct by 12/23/24.

3.6(a)(1)

Primary enclosures.

Two cat primary enclosures housing a total of 9 cats (1 adult and 8 kittens) were identified that were not in good repair. The walls of the enclosures are made of a type of particle board sheets that have an outermost surface layer that is impervious to moisture. There was damage noted in the back corner and/or sides of the walls at floor level that formed an opening in the wall that exposed the space between the 2x4 wood framing and the wall of the adjacent enclosure. In addition, there were several areas of the walls in both enclosures at floor level where the outermost surface layer of the wall panels had peeled off exposing the underlying particle board layer that is not impervious to moisture.

Per this Section, primary enclosures must be kept in good repair. The two primary cat enclosures were not in good repair

Inspection Report

due to the damaged areas of the walls and the missing outermost surface layer of the wall panels that exposed the underlying particle board that is not impervious to moisture and cannot be effectively sanitized. The damaged areas of the two primary enclosures need to be repaired/replaced to maintain the enclosures in good repair. Correct by 1/24/25.

3.154

Environment enhancement to promote psychological well-being.

Although the birds at the facility were socially housed when appropriate and were provided with materials to enhance their environment, a written plan for environmental enhancement to promote the psychological well-being of the birds had not been developed/approved by the Attending Veterinarian and was not available for review at the time of the inspection.

Per this Section, exhibitors must develop, document, and follow a species-appropriate plan for environment enhancement to promote the psychological well-being of birds. The plan must be approved by the Attending Veterinarian and must be in accordance with currently accepted professional standards as cited in appropriate professional journals or reference guides. At a minimum, the plan must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices, and exemptions. The Licensee needs to develop an environmental enrichment plan appropriate for the species of birds maintained and the plan must be approved by the Attending Veterinarian. Correct by 12/23/24.

This inspection and exit interview were conducted with Licensee.
