### 3.131(a) Repeat

#### Sanitation.

Accumulations of hair and dust remain in the fox room. Also, hair, excreta, and urine mineralization is built up on the fox enclosure litter trays. Accumulations of hair, urine, excreta, and other debris may harbor disease hazards, posing a threat to animal health. Enclosures, litter trays, and housing facilities shall be cleaned as often as necessary to minimize disease hazards and reduce odors.

Remains Uncorrected

### 3.131(c) Repeat

#### Sanitation.

An excessive amount of clutter and stored items remain in the animal housing areas. Stored items impinge space such that there is minimal clearance to work with and access the animals, clean enclosures and housing rooms, as well as provide repair to and maintain enclosures. Optimal animal welfare is hindered in such cramped quarters. Premises shall be kept clean and in good repair to protect the animals from injury and to facilitate prescribed husbandry practices.

Remains Uncorrected

This inspection and exit interview were conducted with the President and Vice President.
