#### Environment enhancement to promote psychological well-being.

The facility had no documented Bird Environmental Enrichment Program (BEEP) available for review during this inspection. The facility has enrichment activities in place for their birds, but the formal documentation of these activities into a BEEP that specifically addresses social grouping, environmental enrichment and special considerations and has received approval by their Attending Veterinarian (AV) has not been completed.

Not having the required BEEP available for evaluation during inspection may result in insufficient enrichment activities, improper social groupings, and/or a lack of special considerations for certain birds.

The regulations state that dealers, exhibitors, and research facilities must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must be in accordance with the regulations in this subpart and with currently accepted professional standards as cited in appropriate professional journals or reference guides. This plan must be made available to APHIS upon request, and, in the case of research facilities, to officials of any pertinent funding agency.

Correct by 14December2023.

This inspection and exit interview were conducted with facility representatives.
