Certificate: **91-A-0096**
Site: 001
SCHREINER FARMS

Type: ROUTINE INSPECTION
Date: 14-JUL-2017

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

The records for the covered animals is incomplete. There were no current records found for the giraffes, zebras, or wallaroos. The camel records were not updated with this year's calf crop.

Maintaining accurate records is important for tracking of animals.

Correct in one month, by 8/14/2017.

3.131(c)

SANITATION.

In the camel/alpaca pasture near the house, the wire fencing fabric wrapped around the trees is damaged to the point that most of the trees have broken wires and sharp points projecting outward. The animals obviously rub on the wire placed to prevent their chewing on the trees. The broken wires now pose a risk of injury to the animals. The wire needs to be repaired, replaced, or removed to prevent injury to the animals in the enclosure.

Correct in 45 days, by 8/28/2017.

This inspection and exit interview were conducted with the farm manager.

Note: dissolution of the partnership will invalidate the license. Once the dissolution process is complete, the party responsible must apply for a new license. Until a new license is in place, no covered activities may take place.
