### 2.40(b)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

7 hedgehogs were observed to have excessively long and curling toenails on one or more limbs. Long, curled nails may interfere with normal gait or grow into the paw and cause an injury. The facility must ensure that nails are trimmed regularly to prevent injury.

Correction was begun during the inspection, and will be completed by March 9, 2024.

This inspection and exit interview were conducted with the facility representative.
