Loma Linda, CA 92350

Customer ID: 1186  
Certificate: 93-R-0006  
Site: 002  
LOMA LINDA UNIVERSITY

Type: ROUTINE INSPECTION  
Date: 12-JUL-2016

### 3.125(a)

#### FACILITIES, GENERAL.

Sheep pen:

- A shade structure had approximately twelve metal, pole support stakes in the ground with sharp, pointed ends which have become exposed from soil erosion in this pen. These sharp edges or points may cause injury to the animals. Additionally, continued erosion of soil around support structures may reduce the structural strength and stability and potentially cause animal injury.

-- A piece of metal wire with protruding, pointed ends was tied to a T-post and located in an area within contact of the animals which may cause injury.

\*\*This item was corrected during inspection by removing the wires.

All enclosures must be structurally sound, kept in good repair and free of sharp, protruding points or edges in order to protect the animals from injury and to contain the animals. A system of timely identification, facility repair and maintenance must be in place.

Correct by 08-05-2016.

Exit interview was conducted with a facility representative.
