## Inspection Report

---

A contingency plan needs to be available on inspection to ensure that a plan has been developed and would be implemented in case of vehicle mechanical/power breakdown, accidents, animal escapes, or natural disasters most likely to be experienced. This planning and implementation potentially decrease the number of adverse effects on the health and well-being of animals in an emergency event or disaster.

Dealers, exhibitors, intermediate handlers, and carriers must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster.

Correct from this day forward.

This inspection and exit interview were conducted with the licensee.
