

## Inspection Report

North Carolina A&T State University  
Lab. Animal Resource Unit  
116 Webb Hall  
Greensboro, NC 27411

Customer ID: 813

Certificate: 55-R-0022

Site: 001

NORTH CAROLINA A&T STATE UNIVERSITY

Type: ROUTINE INSPECTION

Date: 13-SEP-2016

### 3.31(a)(1)

#### SANITATION.

Wet, compressed, and soiled litter covered 1/3 to 1/2 of the floors of 7 out of 8 enclosures of guinea pigs. Guinea pigs' abdomens were noted to be stained and feet were reddened. No evidence of skin breaches or infection were noted. Wet, soiled litter can result in foot and respiratory infections which compromises the health of the animals. Per this section, primary enclosures shall be cleaned and sanitized often enough to prevent an accumulation of excreta or debris. Correct by September 14, 2016.

### 3.128

#### SPACE REQUIREMENTS.

Nineteen gerbils were housed in one enclosure measuring 15 x 12 inches. Eight gerbils were housed in one enclosure measuring 18 x 9 inches. The remaining 13 gerbil enclosures provided adequate space. Overcrowding of animals prohibits normal postural and social adjustments and can lead to poor health and increased mortality. Correct by September 14, 2016.

This inspection and exit interview were conducted with facility manager.
