FACILITIES, GENERAL.

The floor of the Kinkajou enclosure was in disrepair. The floor was crumbling and jagged and the layer underneath was exposed. This condition prevents the surface from being adequately sanitized. In addition, this could cause the animal to become ill if the floor material is ingested. The facility needs to repair this area and ensure the material can be easily sanitized.

*****Correct by March 1, 2018

An exit briefing was conducted with the facility representative.
