---

STATE OF MAINE DEPT INLAND FISHERIES & WILDLIFE  
284 STATE STREET 41 S H S  
AUGUSTA, ME 04333

Customer ID: **1964**  
Certificate: **11-C-0002**  
Site: 001  
STATE OF MAINE

Type: ROUTINE INSPECTION  
Date: 04-MAY-2021

---

### 3.125(a) Critical

#### Facilities, general.

Item One: Critical

Two *Peromyscus leucopus* mice were given to the facility by a member of the public. The animals were in a cardboard box that was temporarily enclosed in a larger tote box with ventilation holes inside a room to maintain the animals until they could be placed into permanent housing the next day. The animals escaped both boxes during the night and were not recaptured, despite the facility's best efforts with baited humane traps. The licensee must ensure the housing facilities are appropriate and contain the animals securely.

Correct by: Immediate; the facility has updated its policy for this species

Item Two: Non - critical

Unprotected electrical outlets were located in the den quarters of two of the mountain lions in a position accessible by the animals. Exposed outlets may present a risk to the animals of electrocution, leading to injury. The licensee shall

## Inspection Report

---

maintain the facilities to protect the animals from potential injury from access to electric power.

Correct by: Close of business day

### 3.131(a)

#### Sanitation.

15 northern flying squirrels housed in a wood and wire enclosure had large accumulations of feces and urine in two corners of a shelf in the cage. The feed bowl had dark caked on material on the chewed outer rim of the bowl that may have included feces. Built up deposits of excreta in enclosures are a source of contamination that can lead to adverse health outcomes for the animals. The licensee must ensure the removal of waste materials as often as necessary to minimize disease hazards.

Correct by: Close of business

This inspection and exit interview were conducted with the facility representative.
