Type: ROUTINE INSPECTION
Date: 17-SEP-2024

3.158(d)

Cleaning, sanitization, housekeeping, and pest control.

Numerous wild birds were observed in and around the enclosures housing ducks and turkeys, as well as in an area used to store hay. There was also a mild accumulation of droppings from these birds on the ledges of the turkey enclosure. Pests, such as wild birds, can transmit diseases and affect the health and well-being of animals. The facility must ensure that a safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests is established and maintained so as to promote the health and well-being of the birds and reduce contamination by pests in animal areas. Correct by December 17, 2024.

This inspection and exit interview were conducted with a facility representative.
