Environment enhancement to promote psychological well-being.

The facility did not have a documented environment enhancement plan for any of their avian species. Failure to develop and document an environmental enrichment program for birds can negatively impact their health and well-being, causing unnecessary psychological distress. The facility must develop, document and follow a species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, any exemptions to the plan, and be in accordance with currently accepted professional standards. Correct by Sept 1, 2024

This inspection and exit interview were conducted with facility representative.
