

## Inspection Report

Billy Harvey  
P.O. Box 980  
Cornville, AZ 86325

Customer ID: **8374**  
Certificate: **86-C-0073**  
Site: 002  
BILLY HARVEY

Type: ROUTINE INSPECTION  
Date: 14-OCT-2015

### 2.40(b)(2) DIRECT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\*The raccoon had brown-greenish discharge and buildup from both eyes. Additionally, the right eye appeared hazy/cloudy. Eye discharge can be a sign of eye disease. Depending on the cause, the condition can be both progressive and painful. Additional diagnostic testing is necessary to properly determine the cause best course of treatment and alleviate discomfort.

The licensee must have this animal examined by a veterinarian by 5:00 p.m on October 21, 2015, to obtain accurate diagnoses and appropriate treatment plans for the issue cited above. The outcome of this consultation must be provided to the inspector upon request. This documentation should include the veterinary diagnosis, all diagnostic tests and the outcome of those tests that were performed by the veterinarian, any medications prescribed along with the dosing instructions, and entries on a log and/or calendar and/or animal health record that list when the medication is administered to the animals.

There should also be an entry at the end of the treatment to document the health status and condition of each animal at that point, to indicate a time frame to address current issues that require further veterinary treatment, and the need for follow-up and any further veterinary care prescribed.

### 3.125(a)

#### FACILITIES, GENERAL.

\*\*\*The wire mesh material (used to prevent digging) in the coyote enclosure was exposed in several areas. The exposed mesh pose a risk of injury to the animal by limb entrapment and possible breakage.

\*\*\*The chain link material around the trees in the ram (2 animals) enclosure ,at the bottom is turned up and in with sharp points. The fencing material was not maintained in good repair to protect the animals from injury.

\*\*\*The chain link material in the alpaca enclosure had several sharp points. The fencing material was not maintained in good repair to protect the animals from injury.

## Inspection Report

---

Failure to maintain housing facilities in a structurally sound manner can cause injury to the animals. A system should be in place so the indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

To be corrected by 10/28/15.

### 3.131(d)

#### **SANITATION.**

\*\*\*The food and food receptacle in the wallaby enclosure had an excessive amount of ants on it.

\*\*\*The food and food receptacle in the raccoon enclosure had an excessive amount of ants on it.

Disease can be transmitted by the pests to the animals and can contaminate feed and water. The licensee must establish and maintain an effective program for the control of pests to promote the health and well-being of the animals and reduce contamination by pests in all animal areas.

To be corrected by 10/21/15.

The inspection and exit briefing were conducted on-site with the owner.
