1600 Bowers Rd
Seagoville, TX 75159

Customer ID: **12469**

Certificate: **74-C-0727**

Site: 001

Dallas Independent School District ENVIRONMENTAL L

Type: ROUTINE INSPECTION

Date: 10-JAN-2017

3.125(a) REPEAT

FACILITIES, GENERAL.

The fence enclosing the pig pasture is not sufficient to adequately contain the pigs. The fence is composed of 4x4 welded wire panels attached to T posts and other metal post. Per the licensee the pigs like to lie next to the fence which causes the panels and the posts to bend outward. This could cause the fence to fall down and allow the pigs to escape. A fence adequate for pigs needs to be built.

To be corrected by: May 1, 2017

3.127(c)

FACILITIES, OUTDOOR.

The pig areas next to the barn are a muddy mess. Although pigs like to wallow in mud they must be able to get out of the mud if they choose. Consistent exposure to mud can cause feet problems and overall poor health. Some type of drainage or other method for preventing this area from becoming so muddy needs to be implemented. Full time on a concrete floor is not an acceptable option.

To be corrected by: March 1, 2017

3.131(c)

SANITATION.

The large pig area next to the barn has old fencing and other clutter lying around or stuck in the mud. Facilities need to be kept clean and in good repair to protect the animals from injury and disease. The old fence could cause injury from exposed wire or sharp edges. The other clutter lying around could cause injury from sharp edges or could be eaten causing health issues. This area needs to have all the junk removed.

To be corrected by: January 30, 2017

This inspection and exit interview were conducted with the licensee.
