ARIZONA FISH AND GAME DEPARTMENT

Type: ROUTINE INSPECTION

Date: 26-SEP-2017

3.131(a)

SANITATION.

The indoor wire enclosure housing the 2 prairie dogs during the time when it is too hot to be outside, has a sliding waste pan to catch any feces and urine. The sliding waste pan is filled with fecal matter and urine soaked newspaper. The facility representative stated that the cage is only cleaned once a week.

Excreta should be removed from primary enclosure as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. It is necessary to maintain a clean enclosure and remove and replace newspaper when they are soiled and stained to prevent odor and reduce the risk of disease to the animals.

Date to be Corrected: 9/29/2017

This inspection and exit interview were conducted with a facility representative.
