Type: ROUTINE INSPECTION
Date: 14-FEB-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

* A bottle of Oxytocin has an expiration date of July 2015. This medication was located in the pharmaceutical refrigerator and available for use on the dogs. Expired medications may have deteriorated past the point of being safe or effective. The licensee must ensure that all medications used in the facility are not expired and labeled properly in accordance with standard veterinary practices and manufacturer's recommendations.

** To be corrected by: Immediately (2/14/17)

3.11(b)(2)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

* Accumulations of feces, dirt, food waste and grime was seen on the floor, interior walls and in the dog door entrances of 8 enclosures housing 22 dogs. A build up of dirt and grime was noticed along the lip of the water catch buckets and there is a slick oily type material in the bottom of the bucket that the dogs have access to. Accumulations like these indicate lack of cleaning, and can increase living and breeding grounds for pests, soil the dogs, and enhance disease hazards by preventing proper sanitization to occur. Proper routine cleaning must be done to prevent accumulations and to allow for complete and successful sanitization of surfaces using one of the methods prescribed in paragraph (b)(3). All surfaces must be maintained through a regular routine of cleaning and to include sanitizing at least once every 2 weeks or more often if necessary to prevent accumulations and minimize disease hazards.

** To be corrected by: 2/16/17

This inspection and verbal exit interview were conducted with licensee on 2/14/17.
