Type: RE-LICENSE INSPECTION
Date: 08-JUL-2025

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility used an expired anesthetic drug on a regulated animal for an elective surgical procedure. On 25 April 2025, "Magoo", a 10-year-old male California Sea Lion, underwent a planned dental procedure and was administered Demerol (meperidine hydrochloride) with an expiration date of 01 July 2024. The animal appeared healthy during inspection. Use of expired medical products are not an appropriate method to prevent, control, diagnose or treat diseases and injuries in animals. The facility must ensure appropriate methods are in place to control, diagnose and treat diseases and injuries, which includes the use of unexpired drugs.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 06 September 2025 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires (10 August 2025).
