Site: 001

WILDLIFE WORLD ZOO INC.

Type: ROUTINE INSPECTION

Date: 08-APR-2025

2.40(b)(2)

Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The hooves of an approximately 12-year-old female red river hog "Trisha" are excessively overgrown and have not been trimmed since 2022. All 4 feet are deformed. The animal appears reluctant to move and has a lameness when walking. The medical record notes a history of osteoarthritis. A facility representative stated there is not an appropriate scale available to accurately weigh the animal. During inspection the animal appeared overconditioned with a smooth fleshy appearance. Overgrown hooves can cause lameness, pain and can lead to other serious conditions. The licensee must work with the Attending Veterinarian to develop a plan for timely treatment and must maintain a program of adequate veterinary care.

Correct by end of business 17 April 2025.

This inspection and exit interview were conducted with the facility representatives.
