Type: ROUTINE INSPECTION  
Date: 01-JUL-2025

---

### 2.40(b)(2) Direct

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Five wolves and one tiger have varying levels of hair loss and damage to the skin on the edges of the ears. Damage includes thickened skin, scabs, and sores. Flies were seen landing on all of the animals' ears. The animals were observed shaking their heads and rubbing their ears. The facility representative states that the Attending Veterinarian has verbally instructed them to use a variety of products for fly control both on the animals and in the environment. The licensee is using "Vicks VapoRub" on the ears but none of the other treatments recommended by the AV.

Skin problems such as the above are most commonly caused by flies bites and can be painful. The licensee must use appropriate methods to prevent, control and treat injuries. Additionally, the licensee must seek consultation with the attending veterinarian for these animals' care.

To be corrected by seeking veterinary care for these animals by close of business on 7/2/2025

### 3.78(e)

#### Outdoor housing facilities.

A public barrier was not present between two lemur enclosures and the viewing public. Barriers between non-human primates and the public restrict physical contact. Barriers must be present between non-human primates and the public. Correct by 1 Sept. 2025.

### 3.127(c)

#### Facilities, outdoor.

There was standing water and mud identified in one brown bear enclosure, one wolf enclosure, one hyena enclosure and the warthog enclosure. The standing water in the bear and warthog enclosures were green with algae growth. The excess water had turned the majority of the hyena and wolf enclosures into mud. Excess, standing water and mud in enclosures can lead to an increase in the presence of pests, create odors and can soil the animals present in those enclosures. Excess water must be rapidly eliminated from all enclosures. Correct by 15 July 2025.

This inspection and exit interview were conducted with a facility representative.
