

## Inspection Report

Wayne Brubaker  
385 Hammertown Road  
Narvon, PA 17555

Customer ID: **327259**  
Certificate: **23-A-0555**  
Site: 001  
WAYNE BRUBAKER

Type: ROUTINE INSPECTION  
Date: 03-FEB-2015

### 3.31(a)(1)

#### SANITATION.

There is a build-up of brown scale and debris on the bottom and lower sides of the clear plastic containers. The cleaning process (method and frequency) utilized is not effective in removing this accumulation of scale and debris inside the enclosures. Ineffective cleaning and sanitation exposes the animals to potential disease hazards such as bacterial, fungal, and viral diseases. Primary enclosures must be cleaned often enough to prevent an accumulation of scale, debris, excreta and soiled bedding and must be sanitized at least once every two weeks. Correct by ensuring that all primary enclosures are kept clean to prevent and accumulation of scale and debris and that enclosures are sanitized at least once every two weeks.

Correct by February 7, 2015

An exit briefing was conducted with the owner's wife.

Prepared By: ROBERT MARKMANN, A C I USDA, APHIS, Animal Care
