Environment enhancement to promote psychological well-being.

The facility does not have a written program for environment enhancement for their owl. A facility representative has been providing the owl with regular enrichment opportunities, however, a documented program hasn't been developed. A written plan for environment enrichment is necessary to ensure the psychological well-being and overall health of the bird.

Exhibitors must develop, document, and follow a species- appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must address social grouping, environmental enrichment, special considerations, restraint devices, and exemptions.

Correct by: October 14, 2023.

This inspection and exit interview were conducted with a facility representative.
