Leon Walthall  
Peggy Van Huss  
21010 Hwy. 16  
Siloam Springs, AR 72761

Customer ID: **25856**

Certificate: **71-A-1134**

Site: 001

PEGGY VAN HUSS & LEON WALTHALL

Type: ROUTINE INSPECTION

Date: 29-NOV-2017

### 3.1(a)

#### HOUSING FACILITIES, GENERAL.

- In the first run of the west sheltered housing area, a metal support pole has rusted partially through the pipe at the bottom of the pole, leaving an exposed hole in the metal. This is a potential source of injury to the animals, and also weakens the support pole. The pole must be repaired or replaced.
- In the third enclosure of the western housing area, the wall of the shelter itself is damaged and most the wall section is missing. This is not an effective shelter, and does provide adequate protection for the dogs. This wall must be replaced and maintained.
- On the north side of the main shelter building, two runs are missing the indoor/outdoor flaps. This allows wind and rain to enter the sheltered housing area and could negatively impact the animals. These weather flaps must be installed and maintained.

All items were corrected by the facility on the day of the inspection.

This inspection and exit interview were conducted with facility representative.

#### Additional Inspectors

Whiteley Robert, Animal Care Inspector

Prepared By: TYGART MICHAEL, D V M USDA, APHIS, Animal Care

Date:
