ROBERT CHILDRESS

Type: ROUTINE INSPECTION
Date: 28-JUL-2014

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written program of veterinary care was not present at the time of this inspection. The continuation sheet to document veterinary visits was present and indicated the attending veterinarian last signed the sheet in August 2013. The complete written program of veterinary care must be present for traveling exhibitors to provide adequate guidance to the animal care staff to maintain the health of the animals. The written veterinary program must be available for APHIS officials during inspection so that the plan can be reviewed to determine if the program covers the animals present and that the plan is being followed.

Correct by August 5, 2014

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

Acquisition records were not present for the camel and 5 goats at time of inspection. Records must be kept and accurately maintained to ensure compliance with the regulations of the Animal Welfare Act and to allow tracking of animals for health and ownership purposes. The records must be present to reflect the current inventory of animals, including the species and sex, date of acquisition, and name and address of the person from whom animals were purchased or otherwise acquired. The manager was provided with APHIS form 7019 at time of inspection to help maintain records.

Correct by August 5, 2014

3.137(a)(2)

PRIMARY ENCLOSURES USED TO TRANSPORT LIVE ANIMALS.

The camel section in the animal trailer (SC license plate PT79516) had exposed electric wires and cords running along both upper sides, a 12 volt light fixture without a cover, an electric outlet without a safety cover, and a piece of chewed black plywood on the left side of the trailer. The camel transported in this section of the trailer could be injured on the electric wires, cords, outlets, light fixture, and chewed wood. The trailer must be repaired to prevent possible injury to the camel. The camel section in the trailer was corrected before the exit briefing.
