Type: ROUTINE INSPECTION
Date: 11-APR-2017

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Hache-Hi, a 17 year old male wolf, was observed to have a stiff, slow gait. He is on joint supplements, however his arthritis seems to have progressed enough to require more aggressive treatment to promote his comfort. His stiff movement and resulting gait abnormalities can cause abnormal nail wear or overgrowth. This can also affect his gait, resulting in a vicious cycle. This wolf needs to be evaluated by the Attending Veterinarian (AV) to determine if additional treatment can help him to be more comfortable. Correct by contacting the AV immediately to request that she evaluate this animal within 10 days, by April 21, 2017.

The Program of Veterinary Care (PVC) was written nearly five years ago (7/23/2012) and hasn't been updated. Some provisions are not being followed, such as annual fecal exams and sedating animals routinely every three years for a full physical exam. The PVC should be rewritten with the AV and licensee in collaboration. It should be reviewed regularly to ensure that routine husbandry and veterinary care procedures are fully addressed and that the plan is being followed as written. Correct within 30 days, by May 11, 2017.

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Wapithe, a 17 year old female wolf, has soiling around her perineal area. This may indicate an illness such as a urinary tract infection. Daily observation to note changes such as the soiling is required so that problems can be reported to the Attending Veterinarian in a timely manner to be addressed. Correct by contacting the AV today to schedule a visit within 10 days, by April 21, 2017.

This inspection and exit interview were conducted with facility personnel.

Additional Inspectors

Hood Brian, Animal Care Inspector

Prepared By: HALLBERG GWYNN, D V M USDA, APHIS, Animal Care
