Type: ROUTINE INSPECTION
Date: 27-MAR-2023

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The licensee was unable to provide a written program of veterinary care. A written program of veterinary care is necessary to indicate that care for both the health and well-being of all covered species is provided.

Each exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

Each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor.

TO BE CORRECTED BY: APRIL 17, 2023

2.40(b)(2) **Direct**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An adult dromedary camel named Humphrey, was observed to have a severe overgrowth, and swelling of the gums of his lower jaw. This overgrowth and swelling have caused the displacement of his teeth. Further, the camel was observed

Inspection Report

rubbing the overgrown tissue on the wire fence fabric, causing it to bleed.

The licensee contacted a licensed veterinarian, via text, back in February 2023 and the veterinarian stated that the condition was grave. This camel must be seen by a licensed veterinarian to determine the cause, prognosis, and treatment for this condition. The licensee shall establish and maintain an adequate program of veterinary care that would use the appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care.

TO BE CORRECTED BY: MARCH 31, 2023

2.75(b)(1)

Records: Dealers and exhibitors.

Records of acquisition were unavailable for review. The record of animals on hand, that was provided, only indicated the number of cavies, red kangaroo, camel, and ostriches without the required information pertaining to from where they were acquired. Three lambs and two zebu calves have been born but the births have not been documented.

Every dealer other than operators of auction sales and brokers to whom animals are consigned, and exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

Inspection Report

- (i) The name and address of the person from whom the animals were purchased or otherwise acquired;
- (ii) The USDA license or registration number of the person if he or she is licensed or registered under the Act;
- (iii) The vehicle license number and State, and the driver's license number (or photographic identification card for nondrivers issued by a State) and State of the person, if he or she is not licensed or registered under the Act;
- (iv) The name and address of the person to whom an animal was sold or given;
- (v) The date of purchase, acquisition, sale, or disposal of the animal(s);
- (vi) The species of the animal(s); and
- (vii) The number of animals in the shipment.

Records of acquisition are necessary to ensure that animals have been appropriately obtained.

3.131(c)

Sanitation.

Housekeeping: Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Accumulations of trash shall be placed in designated areas and cleared as necessary to protect the health of the animals.

The following items are not clean and/or in disrepair:

- In the sheep enclosure a ladder was stored against the shelter building, a paint tray, numerous strands of colored bailing twine, a small metal trash can, broken wood pieces, and a wooden top rail plank are present on the ground inside of both sides of this enclosure.

Inspection Report

- A top rail is missing from one section of the sheep enclosure thus leaving this section structurally unsound.
- In the camel enclosure, several fence planks are broken at the front corner, closest to the road. Also, the wire mesh on this fence, in the same area, has been damaged and lifted up at the base, thus leaving a gap under this enclosure fence.
- In the cavy enclosure, next to the sheep & camel barn, the covies have dug a hole in the earth thus exposing wire mesh and a piece of wood with a nail protruding from the end. This opening should be filled in to protect the covies from getting injured by the exposed wood and wire mesh.
- The largest cavy enclosure has exposed coated, chicken wire present in the ground around the interior perimeter. This wire serves as a dig guard. This exposed wire should be covered to prevent injury to the covies housed therein.
- On the sheep & camel barn, a new metal roof has been installed. However, on the rear corner, a section of metal trim is not secure and sharp protruding edges are present.

Miscellaneous items within animal enclosures could cause injury or harm to the animals housed inside of the enclosures. Miscellaneous items should be removed to protect the health and well-being of the animals.

Repairs and/or replacements should be made to all items that are broken or in disrepair to ensure that facilities are in good repair to protect the health and well-being of the animals.
