Type: ROUTINE INSPECTION  
Date: 15-JUN-2016

### 2.40(b)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The carbon dioxide tank used for the euthanasia for small rodents has a pressure reducing regulator, but there is currently no flow meter. The 2013 edition of the AVMA Guidelines for the Euthanasia of Animals states that an appropriate pressure regulator and flow meter or equivalent with demonstrated capability for generating the recommended displacement rates for the size container being utilized is absolutely necessary for the humane application of CO<sub>2</sub>. A flow meter needs to be added to the CO<sub>2</sub> tank and pressure reducing regulator to ensure the animals are appropriately euthanized following the AVMA Guidelines. Correct by providing a flow meter to the CO<sub>2</sub> tank to monitor the rate of flow for euthanasia. Correct by July 5, 2016.

An exit briefing was conducted with the owner, Robert Markmann, ACI, and Jean Bolinger, Compliance Specialist.

#### Additional Inspectors

Bolinger Jean, Compliance Specialist
