Customer ID: 9345  
Certificate: 33-B-0328  
Site: 001  
STEVEN FOX

Type: ROUTINE INSPECTION  
Date: 17-MAR-2016

### 3.128

#### SPACE REQUIREMENTS.

Three flying squirrels were housed in an inappropriate enclosure during the time of inspection. The entire enclosure measured approximately 20 inches long by 28 inches wide by 4.5 inches tall. There were five divided areas within the enclosure measuring approximately 5 inches wide by 20 inches long by 4.5 inches tall. The animals were housed within one of the five divided areas. The animals have been housed in this enclosure for approximately 2 months as per the facility owner. This enclosure does not allow the flying squirrels to express species typical behaviors.

Place the animals in an enclosure that will allow for species specific behavior to provide for their well-being.

To be corrected: This was corrected between the time of inspection and the exit briefing

### 3.131(d)

#### SANITATION.

Excessive amounts of rodent feces were present on top three animal transport enclosures within the animal building during the time of inspection. The facility owner indicated that there aren't currently any provisions to control wild rodents within the facility. Wild rodents can carry diseases that affect animals.

Establish, implement, and maintain an effective program for the control of wild rodents at the facility.

To be corrected: This was corrected between the time of inspection and the exit briefing

Chad Moore, ACI and Dawn Barksdale, VMO, conducted the inspection exit briefing with the facility owner.

#### Additional Inspectors

Barksdale Dawn, Veterinary Medical Officer
