

Inspection Report

Bhagavan Antle
851 Folly Ranch Lane
Myrtle Beach, SC 29588

Customer ID: 9276
Certificate: 56-C-0116
Site: 002
T.I.G.E.R.S.

Type: ROUTINE INSPECTION
Date: 18-FEB-2016

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written Program of Veterinary Care (PVC) was missing the required frequency for regularly scheduled visits by the attending veterinarian (AV) to the site premises. Formal arrangements with the facility's AV must include regularly scheduled visits to the premises. To ensure adequate veterinary care to regulated animals, the licensee and the AV should review and update the PVC as soon as possible.

Correct by: March 18, 2016

3.125(d)

FACILITIES, GENERAL.

A large accumulation of debris consisting mainly of dead vegetation was observed in very close proximity to the northwest portion of the perimeter fence. Removal and disposal of debris/trash at the facility's buildings and grounds are paramount to minimize vermin infestation into primary enclosures and potential disease hazards to regulated animals. Debris and trash at the facility should be removed and properly disposed as soon as possible.

Correct by: March 18, 2016

3.127(d)

FACILITIES, OUTDOOR.

The facility's perimeter fence was found in need of repair along the south and northwest portions. The barb wire lines that rest on the extension arms of the fence were out of place and/or damaged along the affected fence portions. The facility's perimeter fence must be maintained in good repair and be structurally sound so that it protects regulated animals by restricting vermin and/or unauthorized persons from going through it, over it, or under it, and so that it can function as a secondary containment system for the animals at the premises. The perimeter fence needs to be repaired/replaced as soon as possible.
