Type: ROUTINE INSPECTION
Date: 18-JUL-2024

2.38(f)(1) Critical

Miscellaneous.

On 07/03/2024, two cotton rats sustained degloving tail injuries resulting from animal technicians grasping them from their tails during an animal identification procedure. Both animals were immediately and humanely euthanized following the injuries. Failure to appropriately handle all animals at all times may cause an animal to experience unnecessary stress, pain or discomfort.

Handling of all animals must be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.

The IACUC reported this event to a USDA Inspector prior to inspection and have taken corrective actions to prevent reoccurrence of this issue.

Correct from this day, 07/23/2024, forward.

This inspection and exit interview were conducted with a facility representative.
