### Repeat

#### Facilities, general.

The primary enclosure housing two bactrian and two dromedary camels has a grain feeder attached to the wall. The end of the grain feeder is no longer in place and there are two screws, approximately three inches long, with the sharp point of the screws facing into the enclosure at the end of the grain feeder.

Primary enclosures must be maintained in good repair to prevent injury to the animals contained in the enclosure.

The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

This inspection and exit interview were conducted with a facility representative.
