Type: ROUTINE INSPECTION
Date: 11-MAR-2014

2.40(b)(2) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b)(2)

*A bottle of Azithromycin stored in the whelping facility had a label with an expiration date of 6/25/2013. Medications used after their expiration date may not have the strength or effect intended. The licensee shall provide adequate and appropriate veterinary care. Medications used to prevent and treat disease and illness should be clearly labeled and discarded when out of date.

* A bottle of Combi Pen was stored on the shelf in the whelping facility. The bottle was labeled with the instructions "store under refrigeration between 36-46 degrees F" . Medications not stored under the intended conditions may not have the strength or effect intended. The licensee shall store medications as instructed by the manufacturer label.

* At least two adult dogs at the facility had matted hair. An adult male Poodle ID 715 had mats of hair around his eyes and mouth. Sparky the male Yorkshire Terrier ID 764 had matted hair on his legs and body. His overall hair coat was soiled and appeared wet. Matted hair can be irritating and even painful and may lead to health conditions. Routine grooming is an important aspect of animal husbandry and should be done with a proactive approach so that mats do not form.

* A male Poodle ID 715 had a mass of hair entangled in his bottom front teeth. Once identified the licensee pulled the hair from the teeth. The teeth had buildup of a brownish substance on the surface. And black material in between the teeth. At least one of the top teeth had broken off. His gums were bleeding. During a yearly exam in 2013 dog was identified by the attending veterinarian with a need for dental treatment. On a scale from 1 to 5, with 5 being the most severe the dog was marked as a 5. Bleeding gums, broken teeth and general dental complications can be painful and affect the overall health of the animal. The licensee shall obtain a written diagnosis and treatment plan from a licensed veterinarian and provide care as prescribed. Documentation shall be available at the next inspection.

**** The licensee was informed during the inspection that the dog would need to be seen by a licensed veterinarian within 24 hours for treatment. An appointment was made for that afternoon.

3.1(c)(3) REPEAT

Inspection Report

HOUSING FACILITIES, GENERAL.

(c)(3)

There was an accumulation of feces stuck between two layers of wire coated flooring in the 2nd and 3rd enclosures of the raised outdoor housing facility. The licensee stated that they had already cleaned that morning. There was also an accumulation of waste and bedding material along the sides of the concrete outdoor housing area. Sufficient cleaning is necessary to prevent disease and to provide for the health and well being of the animals. The licensee shall spot clean daily and sanitize accordingly.

3.4(b)(3) REPEAT

OUTDOOR HOUSING FACILITIES.

(b)(3)

The doghouses provided as shelter for the outdoor enclosures had no wind and rain breaks at their entrance. The long metal roof that covers the enclosures offers protection from rain however; there is no barrier from the wind. Adequate shelters offer protection from harsh weather conditions and aid in the ability of an animal to retain body temperature. The licensee shall provide wind and rain breaks at the entrance to all outdoor shelter structures.

3.6(a)(1)

PRIMARY ENCLOSURES.

(a) (1)

There were multiple areas throughout the facility that were in need of maintenance or repair. These areas include but are not limited to;

* The third section (pen 2 & 3) of enclosures of the outdoor portion of the sheltered facility has approximately a three inch gap in the flooring between the runs and the building wall. An animal's legs or body could pass through this section of flooring resulting in injury.

* The sections of wood and plastic enclosing the dog doors has become worn chewed and in some cases are falling apart. Facility maintenance is an important aspect of animal husbandry and assists in providing care for the health and well-being of the animals.

The licensee shall repair or replace these areas and provide primary enclosures that are kept in good repair and protect the animals from injury.

This inspection was conducted with the licensee. An exit briefing was conducted at the close of the inspection on 3/11/14 and during the report delivery on 3/12/14.
