6728 C R 3 1/4  
Erie, CO 80516

Customer ID: **323065**

Certificate: **84-C-0120**

Site: 001

Amaizeing Farm Events, L L C

Type: ROUTINE INSPECTION

Date: 10-OCT-2017

### 3.125(c)

#### FACILITIES, GENERAL.

\*\*\*Opened supplies of food that are fed to the regulated animals are being stored in a barn in containers that are uncovered. The facility representative said there is a known rodent problem and the inspector observed rodent feces in this feed storage room.

The food within these opened containers is unprotected from vermin and other pests. Supplies of food must be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin to ensure the health and well-being of all animals. A system of food storage which adequately protects the supplies of food for all animals must be in place.

To be corrected by: October 17, 2017

### 3.130 REPEAT

#### WATERING.

\*\*\*There was a buildup of green debris on the interior surfaces of the water receptacle in the enclosure that contains seventeen goats and two alpacas.

\*\*\*One of the water receptacles in an enclosure containing two goats contained water that was dark brown in color, with numerous leaves floating in the liquid.

\*\*\*There was a buildup of slimy, brown debris on the interior surface of the water receptacle in the enclosure containing one adult goat and her two kids. There was also debris floating on the surface of the water.

Animals must be provided with clean, potable water to minimize disease hazards and to ensure that they maintain adequate hydration. Water receptacles must be maintained in a clean and sanitary condition. They should be cleaned at a frequency that is adequate to maintain standard husbandry practices.

This inspection and exit interview were conducted with a facility representative.
