Type: RE-LICENSE INSPECTION
Date: 07-NOV-2022

3.127(d) Critical

Facilities, outdoor.

On November 20, 2020 16 javelinas escaped their primary enclosure and two dug under the perimeter fence. Prior to escaping, the javelinas were placed on a pen adjacent to their primary enclosure for extra browse. The adjacent pen's gate did not latch well and they were able to push their way through the gate, into a pen that did not have a dig barrier, and the javelinas were able to dig under the fence. The employees were able to find the javelinas and heard them back to their primary enclosure, but two were unaccounted for. Once out, the two javelinas unaccounted for, were able to dig under the perimeter fence and escaped. Of the two, one javelina was found on the same day and returned to the primary enclosure. The remaining javelina was found and returned to the facility the next day November, 21, 2020. Animals that escaped a perimeter fence can be severely injured and even death. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

Corrected by the time of inspection.

Inspection Report

This is a 1st Re-License Inspection for a Class C license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by January 8, 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
