VETERINARY TECHNOLOGY
DEPARTMENT

Type: ROUTINE INSPECTION

Date: 28-MAR-2023

2.33(a)(1)

Attending veterinarian and adequate veterinary care.

A current Program of Veterinary care was not available for review. The PVC and IACUC documentation had been destroyed by a natural disaster which had occurred in December 2022. All documentation must be kept updated with the current information for the Attending Veterinarian and be available for review during APHIS inspections. The facility must correct this issue.

*****Correct by June 1, 2023

2.33(b)(2)

Attending veterinarian and adequate veterinary care.

Dog number #12 "Venetian" was observed in thin body condition. According to medical records the dog had received a physical examination by the Attending Veterinarian on 2/3/23 and was prescribed treatment for diarrhea with instructions for diagnostic testing if no improvement. The initial treatment was administered as directed however there was no documentation showing that the follow up testing was performed. Medical records indicate that the dog is still showing signs of chronic diarrhea. The dog is currently being treated for anxiety, and according to facility personnel the dog is very nervous while at the facility. Chronic diarrhea can be an indication of underlying health issues and can cause the dog distress. The facility states that the dog is being adopted in the next few weeks and will be placed in a permanent
