JAMES BADMAN

Type: ROUTINE INSPECTION
Date: 27-SEP-2017

3.125(a)

FACILITIES, GENERAL.

The wire fence material (used to prevent digging and escape) in the porcupine enclosure was exposed in several areas. The exposed fence poses a risk of injury to the animal such as by abrading the foot pads or entrapment and fracture of the legs. Failure to maintain housing facilities in a structurally sound manner can cause injury to the animals. A system of monitoring and maintenance should be in place so that all housing facilities remain structurally sound and in good repair to protect the animals from injury.

Date to be Corrected: October 4, 2017

This inspection and exit interview were conducted with a facility representative.
