2.40(b)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the nurse building there are two fourteen week old English Bulldog puppies and in the new house there is an adult Pug which needs to be evaluated by the attending veterinarian. The puppies, no ID, were previously evaluated and treated but one still has a red rash on the under belly and the other is leaking matter from the anus area. The animals were last seen on April 9, 2014. The adult Pug named Chester, chip # 0A01554327, was recently purchased on April 5, 2014. During the inspection the animal had goopy matter on its left eye and it is red on the white area. These animals need to be evaluated by the attending veterinarian. The dealer must maintain written documentation of the evaluation and all treatment to protect their health and welfare.

Affects one adult and two puppies

Correct by May 13, 2014

3.6(a)(1)

PRIMARY ENCLOSURES.

On the new buildings eastern and western exterior sides there are twenty four rusted metal divider panels. On the interior of the same building there are twenty four rusted metal gates. Inside of the building there are six enclosures whose interior / exterior plastic doorway inserts are excess chewed. All rusted metal surfaces and the chewed door inserts need to be repaired or replaced and maintain to insure their structural soundness, facilitate housekeeping practices, protect the animals from injury and prevent the spread of disease.

Affects Twenty-two adults

Correct by July 8, 2014

The inspection and exit briefing was conducted with the Dealer.
