EVELYNS WILDLIFE REFUGE

Type: ROUTINE INSPECTION
Date: 28-APR-2015

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The current Program of Veterinary care states that the raccoons will receive parvo/distemper and rabies vaccinations. It does not address how often these vaccinations should be given. The veterinary signature page indicates the attending veterinarian has not been to the facility since Dec 2013. The current Program of Veterinary Care needs to provide more details about the veterinarian's recommendations for this facility. It should include types of vaccinations and frequency they should be given. It should include any other preventative care the veterinarian feels is appropriate such as fecal exams, deworming protocols, etc. It should also state how often the veterinarian feels he/she needs to visit the facility to adequately consult on the health of the animals.

To be corrected by: May 18, 2015

3.127(d)

FACILITIES, OUTDOOR.

The licensee does not currently have a perimeter fence around the area where animals are and will be permanently housed outdoors. Facilities not entirely indoors must be enclosed by a perimeter fence. For non-dangerous animals the fence must be a minimum of six feet high. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility. The licensee needs to build a perimeter fence or request a variance from the Eastern Regional Director.
