Certificate: **42-A-0926**  
Site: 001  
MARVIN TROYER

Type: ROUTINE INSPECTION  
Date: 26-APR-2016

---

### 3.1(c)(1)(1)

#### HOUSING FACILITIES, GENERAL.

In the "Husky Building" all of the enclosures are constructed of metal fence panels. The metal fence panels of every enclosure are covered in an excessive amount of rust. The rust does not allow for adequate cleaning and sanitization of the fence panels which could increase the disease risk towards the dogs. There are at least fifteen dogs housed in these enclosures.

All surfaces of housing facilities must be free of excessive rust that prevents the required cleaning and sanitization, or that affects the structural strength of the surface. The licensee must replace the fence panels or alter them in a manner that leaves them free of excessive rust. The licensee must ensure that all surfaces of dog enclosures remain free of excessive rust at all times.

Correction date: June 26, 2016

Exit interview conducted with Kelly Maxwell, ACI and the facility representative.
