### ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

A plan for environment enhancement to promote the psychological well-being of nonhuman primates was not available for inspection. The facility must develop, document, and follow an appropriate plan for environment enhancement adequate to promote the psychological well-being of nonhuman primates. The plan must be in accordance with the currently accepted professional standards as cited in appropriate professional journals or reference guides, and as directed by the attending veterinarian. This plan must be made available to APHIS upon request. The plan, at a minimum, must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices and exemptions. The licensee shall develop the written plan as directed by the attending veterinarian and it should be available for inspection at the premises as soon as possible.

Correct by: February 20, 2016

3.125(c)

### FACILITIES, GENERAL.

Evidence of rodent infestation was observed at the floor of main dry food storage building. Also, the dry food storage structure has several gaps of approximately 1/2 inch in length at the floor/wall junctions, which do not prevent vermin entry/infestations. Additionally, nine 50-pound bags were observed in direct contact with the floor; same area where rodent feces were identified. Supplies of food shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin. Facilities shall be structurally sound and shall be maintained in good repair to protect the animals from disease and medical conditions related to food contamination and/or infestation. The licensee needs to repair or replace the damaged wood and all affected areas of the dry food storage building as soon as possible to avoid any potential health hazards to all regulated animals at the premises.

Correct by: February 20, 2016

Exit interview conducted with a facility representative.
