Site: 002

LOCKWOOD ANIMAL RESCUE CENTER

Type: ROUTINE INSPECTION
Date: 25-JUN-2014

3.127(a)

FACILITIES, OUTDOOR.

South enclosures have a lack of ventilated shade adequate for the animals housed in the enclosures. Shelter boxes are present, but would not provide cooling under current weather conditions. When sunlight is likely to cause overheating or discomfort of the animals, sufficient shade by natural or artificial means shall be provided to allow all animals kept outdoors to protect themselves from direct sunlight.

CORRECT BY: 7-29-14

3.131(c)

SANITATION.

Food has been fed by pushing meat through the chain link fencing. Fencing has old, caked food present on mesh. Additionally, there is an excess amount of uneaten, decayed food in the enclosures. Premises shall be kept clean to facilitate the prescribed husbandry practices set forth in this subpart. A system of feeding and cleaning must be in place that maintains cleanliness, reduces odors and pests, and ensures food is nutritious and free from contamination.

CORRECT BY: 07-23-14

Exit briefing conducted with facility personnel.

Prepared By: JEANNE LORANG, A C I USDA, APHIS, Animal Care
