Certificate: **93-C-0232**

Site: 001

BOB DUNNS ANIMAL SERVICES, INC.

Type: ROUTINE INSPECTION

Date: 15-JUL-2015

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

The following records were not available for review by APHIS at the time of inspection:

- Acquisition records for two, 6 month old ferrets.
- Disposition records for the male Armadillo.

Complete and accurate animal records must be kept in order to facilitate tracking of animals. A system of recordkeeping must be maintained that fully and correctly disclose information required by subpart b1 concerning all animals purchased or otherwise acquired, owned, held, leased, transported, sold, euthanized or otherwise disposed of.

Correction date: 30 Jul 2015

### 3.80(a)(2)

#### PRIMARY ENCLOSURES.

The newer enclosure housing the Weeper Capuchin (within eyesight but geographically distinct from the group of capuchin enclosures), does not meet the construction and maintenance standards for non-human primates.

- rusty wire used to patch holes or secure the chain link fencing in the corners had sharp wire ends exposed, both inside and outside the enclosure.
- wire mesh attached to the outside and used to prevent the primates from reaching out of the enclosure had exposed sharp points.

Exposed sharp points could injure nonhuman primates. The enclosures must be kept in good repair. Primary

## Inspection Report

---

enclosures must be constructed and maintained so that they: have no sharp points or edges that could injure the nonhuman primates and protect the nonhuman primates from injury;

-the feeding platform is constructed of particle board, with a coating that has worn off which can no longer be effectively cleaned and sanitized.

The feeding platform shall be constructed of material that can be readily cleaned and sanitized, or replaced when worn or soiled.

Non human primate housing should be constructed and maintained to protect the health and well-being of the animal. Rusted metal, sharp points and unsealed wood cannot be adequately cleaned and may pose a health threat to the animal.

Corrected during inspection by moving the animal out of the specified enclosure.

Inspection completed by Jeanne Lorang ACI & Dr. Katharine Frank, VMO

Exit interview conducted with facility personnel.

### Additional Inspectors

Frank Katharine, Veterinary Medical Officer
