### 3.125(a)

#### FACILITIES, GENERAL.

The metal support pole to the right of the keeper entrance gate into the grey fox enclosure has rusted through, resulting in an approximately 2"x2" hole in the support pole above the level of the concrete flooring. This compromises the structural soundness of the enclosure, and may allow the fox to escape or result in injury. The housing facilities shall be maintained in good repair to protect the animal from injury and to contain the animal.

Correct by 1/13/2018

The domed metal drain grate in the bobcat enclosure has several slats that have rusted through and broken. This has resulted in sharp, rusted metal surfaces on this drain grate on the floor of the bobcat enclosure. The animal may be injured by this sharp metal. The housing facilities shall be maintained in good repair to protect the animal from injury. Correct by 12/15/17.

This inspection exit briefing was conducted with the Wildlife Exhibit Coordinator.
