### 3.150(a) Critical

#### Facilities, general.

On two separate occasions, one in March 2024 and the other in November 2024, the facility lost two chickens due to predation. The facility found the dead birds partly eaten inside the enclosure in March and outside near the enclosure in November. The enclosures were not constructed in a manner to prevent predator entrance and thus did not safely contain the animals. Enclosures must be kept in good repair, protect the birds from injury, and restrict other animals from entering that may negatively affect the welfare of the birds within.

### 2.134(b)

#### Contingency planning.

The contingency plan available for review at the time of inspection was dated in June 2022, more than 3 years ago. The plan must be reviewed at least annually to ensure that it continues to adequately address the regulatory requirements and the facility must maintain documentation of those annual reviews. Correct by ensuring the facility's contingency plan is reviewed annually and maintaining documentation of the annual reviews.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by October 18, 2025 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
